Summary:

Experienced fourth-year student and aspiring front-end developer with a solid foundation in web development. I have spent 6 months at Ulutech Company working on dynamic, responsive web applications using React and Next.js. During this time, I successfully delivered four projects, showcasing my skills in designing and developing user-friendly interfaces. In addition to my front-end expertise, I possess a strong understanding of the back end, having gained knowledge in Django and SQL technologies. My unique blend of skills enables me to collaborate effectively with full-stack teams and contribute to the entire web development process.

Education:

- **Bachelor of Science in Information Technology**
 - *Aleppo University, College of Information Technology*
 - *Expected Graduation Date: Dec 2025*
 - *Relevant Coursework: Web Development, System Analysis, Software Engineering, Database Management, Algorithms...*

Areas of Expertise:

- | | |
|---|---|
| • Front-End Development: React, Next.js. | • UI Frameworks: Material-UI, Tailwind CSS. |
| • Familiar with Back-End Development: Django. | • JavaScript Libraries: Redux, Axios, React Hook Form. |
| • Version Control: Git, GitHub. | • Data Fetching: useQuery. |
| • Responsive Design: HTML, CSS, JavaScript, TypeScript. | • Front-End Components: Swiper.js, React Infinite Scroll. |
| • Database Management: SQL. | |

Soft Skills:

- | | |
|------------------------|-----------------------|
| • Adaptability. | • Problem-Solving. |
| • Work under pressure. | • Team Collaboration. |
| • Positive attitude. | • Time Management. |

Experience:

Company Name: Ulutech Company.

Position: Front-End Developer Intern.

Start Date: June / 2023

Developed and maintained responsive web applications using React and Next.js, ensuring a seamless user experience on various devices.

- Collaborated with a cross-functional team to integrate user-friendly UI/UX designs and implement new features that improved website functionality.
- Utilized Git and GitHub for version control, maintaining a clean and organized codebase.
- Implemented modern CSS frameworks like Tailwind CSS to enhance the styling and performance of web pages.
- Leveraged JavaScript libraries, including Redux, Axios, React Hook Form, Swiper.js, and React Infinite Scroll, to create dynamic and interactive web elements.
- Contributed to the development of efficient API interactions, enhancing the overall user experience.
- Ensured code quality and maintainability through best practices, including code reviews and adherence to clean code principles.

Languages:
